PART NUMBER

P/N	Description
APS-FRT- FARD	FortiAnalyzer Rapid Deploy

LIMITATIONS AND OUT OF SCOPE
The tasks described assume that the appliance is physically installed and connected to the local network or deployed virtually and is operational, providing remote access for its configuration through the Internet. The deployment and connection to the network being the responsibility of the customer or a third party. Some features of the service require the customer to have purchased the appropriate license or additional products. Custom reports are not part of the service, only the standard templates provided are used to configure the reports. Retention of logs beyond the default retention period is not part of the offering.
