

ADISTEC PROFESSIONAL SERVICES

FortiGate Rapid Deploy for FG VM-01 to FG VM-08 series devices

DESCRIPTION

Fortigate® Rapid Deploy for FG VM-01 to FG VM-08 is a set of activities and procedures that, following industry and Fortinet® best practices, help you minimize installation times for Fortigate® appliances, optimizing configuration and ensuring proper production deployment. Applies to Fortigate® Virtual Machines with 1 to 8 vCPU's.

SCOPE OF OUR SERVICE

Base Configuration

- Infrastructure Review
- Configuration of up to one (1) virtual appliance in standalone mode or two virtual appliances in High Availability (HA)
- Firmware Update
- License Activation
- Network Configuration
 - IP address assignment
 - Configuration of up to four (4) network interfaces
 - Configuration of up to (5) Static Routes
 - Configuration of up to two (2) DHCP scopes
- High Availability Configuration
 - Configuration of HA group
 - Configuration of one (1) Heartbeat Interface
- Configuration of Device Management
 - Creation of up to one (1) administrative profile
 - Creation of up to one (1) administrative user
- Configuration of SDWAN for Internet Access
 - Configuration of up to two (2) interfaces
 - Configuration of up to one (1) SDWAN Zone
 - Configuration of up to one (1) performance SLA

Configuration of Firewalling Services

- Configuration of up to ten (10) Firewall Rules
 - Configuration of Traffic Shaping
- Coinfiguration of up to five (5) virtual IPs (Static NAT)

Configuration of UTM Services

- Up to five (5) UTM profiles will be used
 - Default settings will be enabled
 - Any of the default UTM profiles can be selected

Configuration of VPN

- Configuration of up to one (1) site to site VPN tunnel
- Configuration of up to one Remote Access (SSL) VPN Setup for up to five (5) users

Configuration of Logging

- Configuration of up to one (1) logging method
 - Connection to FortiAnalyzer
 - Sending to Syslog
 - Sending via SNMP

Configuration of FortiCloud

- Configuration of FortiCloud for Administration
- Configuration of FortiGate Cloud for Logging

SERVICE DETAILS

Mode: On-Line

Estimated Duration: 16 hours

PART NUMBER

P/N	Description
APS-FRT-FGVM01TO08	FortiGate Rapid Deploy for FG VM-01 to FG VM-08

LIMITATIONS AND OUT OF SCOPE

The client is responsible for ensuring that the Fortigate equipment and any other necessary devices are physically installed and connected to the local network and/or WAN. Adistec will not perform the physical deployment tasks of the equipment and additionally it is required that remote access be provided for configuration via the internet. Integration with authentication services, dynamic routing, creation of VDOMs and validation/authentication of users by means of digital certificates, tokens or other means is excluded. As far as the VPN architecture is concerned, the client is responsible for providing the parameters for the VPN configuration, coordinating and running the tests of the services that pass through the VPN. The configuration of UTM profiles only includes the default configuration and no custom configurations are made. The availability of the sensors to be configured in the UTM profiles depends on the license purchased. Some features of the service require the customer to have the appropriate license purchased.
