

Pro Tools 2022.6

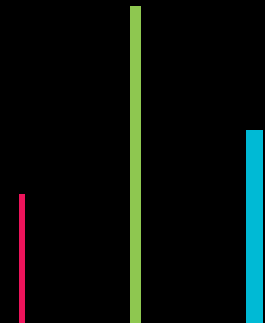

Software Update Now Available

Pro Tools 2022.6 is now available for all current Pro Tools customers on an active subscription or perpetual Software Updates + Support Plan. This update introduces numerous new features and enhancements, including:

- **Dolby Atmos® improvements**
 - Optimized ADM export performance
 - Offline bounce of Dolby Atmos re-renders
 - Link to ADM file with import session data
- **MIDI workflow improvements**
 - Quantize enhancements
 - Double-click on MIDI clip to open docked MIDI Editor by default
 - Auto-expanding grid/nudge display
- **Timecode video overlay**
- **Sends default to a user-defined value**
- **Pro Tools | Sync X - Standalone Mode**
