

ADISTEC PROFESSIONAL SERVICES

Bind ID Rapid Deploy

DESCRIPTION

For organizations, ensuring the correct management of the security of their users' digital identity while providing a user-friendly experience is a challenge. BindID is the world's most advanced passwordless authentication service, which can eliminate the risk of account takeover and reduce operational costs by not having to manage passwords.

And through Adistec consulting services, organizations benefit from the support of a highly qualified team that not only assists them in integrating BindID within their applications also advises them throughout the adoption and change process for both IT teams and users.

LIMITATIONS AND OUT OF REACH

The integration of connecting bus outside those indicated in this document is beyond the scope. Only one (01) connection bus per application is considered, however, different buses can be used for different applications. Activities for communication assistance and adoption workshops consist of working sessions where references, recommendations and best practices are provided; Adistec does not generate manuals, graphic arts, or any other content. Modifications to current authentication systems such as (not limited to) SSO, LDAP, Radius, etc. are beyond the scope of integration. The customer must have a test environment to validate the integrations and have the corresponding backups if a rollback must be performed
