LIMITATIONS AND OUT-OF-SCOPE

The prerequisites such as Firewall and Port configurations are not covered by this service and should be done by the customer. It's assumed that the rack has sufficient space for the installation of the units, as well as that PUDs are available. This service does not include organizing the rack, changing or adjusting cables inside the rack or installing trays. The customer is responsible for making the necessary changes in its network for the correct connection of the equipment.
