

# Avid NEXIS

## Avid NEXIS Shared Storage Array Solutions

Avid's NEXIS family of shared storage systems give creative teams real-time editorial collaboration with performance that accelerates media workflows. The advanced Avid file management system enhances collaboration and maximizes production efficiency by enabling editors to work with a host of tools from Avid, Adobe, Apple®, Autodesk, Filmlight, Blackmagic, and Grass Valley.

ATTO Technology and Avid have an over 20-year history of creating collaborative solutions. The Avid NEXIS shared storage connected to clients via ATTO Thunderbolt™ and FastFrame 25Gb SmartNICs allow users to work at high resolutions and edit more streams of SD, HD and 4K video, ensuring best-in-industry data transfers for high-bandwidth applications.

- › Only purpose built Thunderbolt connectivity product certified by Avid enabling seamless integration with Avid NEXIS shared storage systems.
- › Solution is backed by a solid proven Ethernet stack, data streaming expertise and extensive history in macOS environments.
- › The ATTO and Avid collaboration allows users to complete the most demanding work at hand and achieve the highest performance levels needed today.
